# GRAPE VINES

FRUIT TREES, SMALL FRUITS and ORNAMENTALS

LEWIS ROESCH & SON  
FREDONIA, - N. Y.

## The Chautauqua Gooseberry

This is not a new variety, having been introduced by us in 1894, but it is still the finest, largest and best gooseberry in existence and prolific as any. We have not said much about it of late because the demand for plants was greater than the supply anyway, hence not necessary. But this season we have an extra large supply and the plants are as large and fine as any we ever grew.

NATURAL SIZE

# WHAT OTHERS SAY

## Report of the New York State Agricultural Experiment Station.

Geneva, N. Y., Aug. 4th, 1893.

Dear Sir:—The Chautauqua gooseberry has been fruited at this Experiment Station for several years. During this time it has been vigorous and productive. The fruit is large, smooth, pale yellow, very good and sweet. Very truly yours,

Prof. S. A. Beach, Horticulturist.

## The Chautauqua Gooseberry at the Chicago World's Fair.

At the World's Fair Exhibition there was perhaps the largest show of gooseberries ever made in this country. The Geneva Experiment Station has planted almost every known variety, both from Europe and America, and most of these were on exhibition. In competition with these were two plates of the Chautauqua gooseberry, which overshadowed everything on exhibition, either in the New York State Exhibit or in any other exhibit, in size and beauty, and it was equal to anything exhibited in quality. It is safe to say that the Chautauqua is the largest gooseberry ever produced in this country; it is at the same time a remarkably vigorous grower and equally as great a bearer, being the most productive gooseberry in existence.

## Report of a Former Horticulturist of the New York Experimental Station at Geneva, N. Y.

Geneva, N. Y., May 14th, 1893.

Dear Sir:—My opinion of your gooseberry (Chautauqua) has not been changed, and I consider it as good as the best of English varieties in regard to size of berries and superior to them as to yield and vigor of plant. E. Smith & Sons of this place have watched it for several years and have written you in regard to it. They are business men and would not touch anything of no value. Yours, etc., C. E. Hunn.

## Report of the West Virginia Agricultural Experimental Station.

Morgantown, W. Va., April 6th, 1895.

Lewis Roesch: Dear Sir:—I find that the Chautauqua gooseberry fruited last year and was by far superior to anything we have. It is very prolific, of good size, was not bothered with the mildew, and very hardy. Very sincerely, F. W. Rane, Horticulturist.

## Report of the Connecticut Agricultural Experimental Station.

New Haven, Conn., Sept. 14, 1894.

Lewis Roesch: Dear Sir:—The Chautauqua gooseberry fruited with us this year, and we consider it a promising variety. The berries are very large and smooth and of a pale yellow color. Quality is excellent. The plant is a vigorous grower, and though not sprayed, yet was free from mildew this season. Yours truly,

W. E. Britton, Horticulturist.

## Shrewd and Enterprising Business Men Watching the Chautauqua.

The Chase Nurseries, Geneva, N. Y., Aug. 4, 1893.

Dear Sir:—We notice you have a rather fine gooseberry at the Experimental Station. Are you prepared to offer it either by the hundred, thousand, or the entire stock out and out? We would like to hear from you on the subject. Yours truly,

R. G. Chase & Co.

## E. Smith & Sons, Fruit Growers and Nurserymen.

Geneva, N. Y., Feb. 14, 1892.

Sir:—Would like to ascertain what disposition you made of your seedling gooseberry (Chautauqua) that you sent to the Agricultural Experiment Station here for testing? Would you care to dispose of a limited amount of plants for our own cultivation? Awaiting your reply, we remain, Yours truly,

E. Smith & Sons.

## Chautauqua Giving Excellent Satisfaction.

Adel, Ia., Jan. 14, 1896.

Lewis Roesch: Dear Sir:—I have been watching the Chautauqua for some time, and hesitated to take hold of it on account of its probable susceptibility to mildew, but reports the past season go to show that it is giving excellent satisfaction.

Yours truly,

M. J. Graham.

## Chautauqua Does Remarkably Well.

Lancaster, Pa., Jan. 8, 1896.

Mr. Roesch:—The Chautauqua gooseberry does remarkably well on my ground Large, of the best quality, and a great bearer. Respectfully yours, Daniel D. Herr.

## After Seven Years' Trial Can Heartily Recommend It.

Union Grove, Wis., July 3, 1902.

Lewis Roesch: Dear Sir:—The Chautauqua gooseberry does remarkably well in this locality. After fruiting it for seven years without a failure I can heartily recommend it.

Yours truly,

W. J. Moyle.

# Hardy Perennial Flowering Plants

There are many lovers of nature who wish to grow flowers, but have not the time, facilities or disposition to pet seedlings, or feel they cannot afford the usual bedding plants. To such we recommend Hardy Perennial Plants and Dutch Bulbs. Once planted they stay planted, and spring up from the same root, larger and richer every season. Moreover, after a season or two the increase affords a chance to extend the planting and to supply your friends. Many indeed prefer these to the daily sesame of bedding plants, for the continuous change they afford, with the progress of the seasons.

Fall is the only time to plant Dutch Bulbs and much the best time to set Perennials. Peonies cannot be depended upon to bloom the first season unless planted in the fall. Protect them over winter with a little horse manure.

**Achillea, Rosy Milfoil**—Foliage deep green, finely cut. Flowers appear in large, flat heads, in great profusion from June to late fall, and are a bright cherry red. Very showy. 18 inches.

**Achillea, The Pearl**—Very prolific. Clusters of pure white perfectly double flowers all summer. Fine for cutting. Also for cemetery planting. 12 to 18 inches.

**Anchusa Italica**—This is a new candidate in our list of hardy border plants, and it is a good one. It yields very large brilliant blue flowers in abundance as deep as the Blue Gentian. 4 feet. June and July.

**Aquilegia, (Columbine)**—One of the showiest and dearest of hardy flowering plants. Does well in shade and among stones.

**Aquilegia, Caerulea**—From the Rocky Mountains, often 3 inches in diameter. Blue and white. 2 feet. June and July.

**Aquilegia, Chrysantha**—Golden yellow with long spurs. Distinct. 2½ feet. June and July.

**Dicentra Spectabilis (Bleeding Heart)**—Also old-fashioned but delicate and still popular flower, heart-shaped flowers hanging from all along the underside of its drooping branches. Perfectly hardy. 2 feet. May.

## GRASSES—HARDY ORNAMENTAL.

For stateliness, symmetry, grace and tropical luxuriance select hardy ornamental grasses.

**Erianthus Ravennae**—Resembles Pampas Grass but is hardy and blooms more abundantly. Grows 9 to 12 feet high.

**Eulalia Gracillima Univittata**—Produces an abundance of long but very narrow green leaves with a silvery white midrib. Graceful as a palm. 4 feet.

**Eulalia Japonica Variegata**—Similar to above but larger and striped lengthwise green and white. 6 feet.

**Eulalia Japonica Zebrina (Zebra Grass)**—Very striking and distinct. Unlike most variegated plants the stripes run across the leaves instead of lengthwise. 6 feet.

**Helianthus (Hardy Sunflower.) Multiflorus Plenus**—A blaze of gold in late summer and early autumn. Double. 4 feet. July to September.

**Helianthus Maximilliana**—Immense single flowers, rich, golden yellow, center reddish brown. 6 feet. September.

**Helianthus, Soleil D'Or**—Resembles a cactus dahlia in shape and finish. Clear yellow.

**Eulalia Japonica Zebrina**

**Hollyhocks**—Another valuable old standby, especially useful for the center of a large bed or for a background for smaller plants. 4 to 6 feet.

Of Double Hollyhocks we offer four distinct colors—crimson, pink, white and yellow.

**Hollyhocks, Mammoth Fringed**—Flowers very large, double and semi-double, curled and fringed, blooming from June until frost. Mixed colors only.

**Hibiscus (Mallow.) Crimson Eyed**—Immense flowers of purest white with crimson center. 4 feet. August.

**Iberis (Candytuft) Sempervirens**—A profuse blooming evergreen and very hardy. Well adapted for rockeries, edging, etc. Pure white. 8 inches. April and May.

### IRIS GERMANICA.

The German Iris, also known by its French name, "Fleur-de-Lis," is one of the most showy, beautiful and useful of hardy perennials. It blooms in great profusion in spring and early summer, bearing sometimes 50 to 100 spikes of bloom, deliciously fragrant and fine for cutting. The flowers resemble large orchids in the richness, purity and exquisite shadings of color. Moreover, it is a plant of easiest culture, perfectly hardy and succeeds everywhere. 18 to 24 inches. May and June.

The following are as choice as any:

**Cubero**—Rich orange yellow, falls heavily penciled maroon.

**Fulda**—Satiny white, falls lilac feathered yellow.

**Honorabilis**—Stands golden yellow, falls crimson.

**Mad. Chereau**—White, edged and veined blue. Very delicate.

**Parisensis**—Largest and showiest. Deep purple. Veined white at base of petals.

**Queen of Gypsies**—Falls light purple, feathered yellow; stands grayish purple.

### IRIS KAEMPFERI—Japan Iris.

Marvels of elegance. Imagine a plant sending a dozen spikes of flowers 2 to 3 feet high, each one bearing two to four blossoms 6 to 8 inches across and of the most beautiful colors, markings and veinings, as white, violet, lavender, mauve, sky blue, etc., and you have but a faint picture of the reality. Once planted they are a joy for a lifetime. June and July.

**Blue Danube**—Deep indigo blue, violet shading.

**Gold Bound**—Pure white, one of the best.

**Mahogany**—Dark red, shaded maroon.

**Mt. Hood**—Light blue, shaded darker.

**Paragon**—Rich velvety purple.

**Pyramide**—Lilac blue, veined, white center on each petal.

**Sea Gull**—White, shaded light blue towards center.

**Spotted Beauty**—Wavy, double silky white, spotted with violet crimson.

**Lily of the Valley**—Old and familiar to all. Adapts itself to any kind of a place and care, or no care at all, and always bobs up serenely in May and June with its pretty, delicate, pure white and highly scented bells. Can be grown in pots as well as outdoors. 8 to 10 inches.

**Papaver—Perennial Poppy**—For splendor and gorgeous effect nothing surpasses the hardy Poppy. Showy and conspicuous in any position. Fine to mix with fall-blooming shrubbery.

**Papaver Bracteata**—Mammoth deep blood crimson flowers with black center, 5 to 7 inches across. 2½ feet. May and June.

**Papaver Orientale**—The same as above except in color which is orange scarlet.

**Papaver Nudicaule (Iceland Poppy)**—Bloom abundantly all summer. We offer them in separate colors, white, yellow and orange. 1 foot.

### PAEONIES.

The Paeony is hardy as a burr oak and absolutely free from insect enemies and disease. This is saying a good deal. In addition the flowers are of immense proportions, sometimes reaching 9 inches in diameter, perfectly double, and have a great range of color from the purest white to deepest crimson and yellow. Then, too, the newer varieties rival the rose and carnation in delicacy of fragrance and some say surpass them. Truly a most valuable and useful flower. They are, however, a little slow in getting started, so don't expect too much of them the first year. 3 feet. May and June. There are thousands of varieties, but we only offer a few of the best and most distinct.

**Alba Sulphurea (Mont Blanc)**—Light sulphur yellow, changing to white.

**Anemoneflora**—Delicate rose, with blush white center. Very fine.

**Canary**—New. A strong healthy grower, very prolific. Large and very double. In color a creamy yellow.

**Dorchester (Richardson)**—Quite dwarf and late. Flower very double. Delicate pink.

**Duchess de Orleans**—Large and compact. Deep rose color, center changing from buff to silvery rose.

**Duke of Wellington**—Very large and double. Creamy white, bleaching to pure white.

**Eclatant**—Large full flower, purplish crimson; the best of that color.

**Edulis Superba**—Early and very fragrant. Deep pink.

**Paeony**

**Festiva Alba**—One of the best white varieties. Quite prolific.

**Festiva Maxima**—Probably the largest and most popular of all the paeonies. Pure white center, petals tipped carmine.

**Henry de May**—Very large, double and fragrant. Late; violet purple.

**Modeste Guerin**—Broad flowers of cherry rose with lighter center, changing to light rose. Keeps well.

**Officinalis Rubra fl. pl.**—Rich deep crimson and very early. The old red paeony.

**Queen Victoria**—Large, bluish white.

**Richardson's Perfection**—Large, light flesh, white center.

**Rubra Triumphans**—Early. A beautiful satin finished and intense crimson variety of rich fragrance.

#### **PHLOX.**

There is no hardy flowering plant that will produce such a dazzling display of brilliant colors of all shades from early in July until frost as Perennial Phlox. They have been greatly improved of late years, so that the flowers are much larger, more of them and more brilliant, while their stalks are shorter. The number of varieties are legion, but we only offer a few of the best. 20 to 30 inches.

**Amabilis**—Deep cherry red. Very good.

**Aquillon**—Deep rose, carmine center. Fine.

**August Revere**—Salmon red, dark eye.

**Coquelicot**—A brilliant orange red with violet eye.

**Eiffel Tower**—New. Of a beautiful salmon rose color, with distinct purple eye and defined clearness of flower, charming in the extreme.

**Embrazement**—Coppery red, purple eye.

**Hector**—Immense flowers of a dark pink with large crimson eye.

**Henry Murger**—Big as a dollar, white with large carmine center.

**King of Purples**—Deep glowing purple. Extra fine.

**Miss Lingard**—Blooms from the ground up. Waxy white with lavender eye.

**Charlotte Saisson**—Large white, eye and plaid shadings of richest crimson.

**Pacher**—Rosy pink; large truss. Excellent.

**Richard Wallace**—White with violet eye. Prolific and lasting.

**A. P. Struthers**—Rosy salmon, crimson eye. Very showy.

**The Pearl**—Pure white. A standard.

**Rudbeckia (Golden Glow)**—One of the brightest and showiest of hardy flowers and easiest to grow. It produces a mass of double yellow flowers from July until frost. Excellent for cutting. 6 feet.

**Veronica Longifolia Subsessilis (Blue Bird Flower)**—The Blue Bird flower is one of the very best hardy flower plants of a blue color. Its flowers at a distance resemble blue birds perched in the foliage. It is perfectly hardy and grows in strength and beauty from year to year. 2 feet. May to September.

**Yucca Filamentosa**

**Yucca Filamentosa (Adam's Needle, Spanish Bayonet, Etc.)**—A handsome, stately and striking evergreen plant with long, narrow, palm-like leaves, having white threads growing from their edges. Its flower stem grows 3 to 5 feet high, bearing bell-shaped creamy white flowers in July.

# HARDY DUTCH BULBS

## For Fall Planting Only

These offer more enjoyment and gratification for the money and trouble invested than almost any other flower.

1st—They cost but little to start on and last for many years without replanting.

2nd—They bloom early in the season when flowers are scarce.

3rd—They furnish such a mass of gay colors with but little foliage and no brambles or thorns. Many of them are very fragrant also.

4th—They are prompt in their habits. Bloom for some five weeks early in spring; then the leaves dry up early in June and make room for annuals or bedding plants the rest of the season.

5th—They can be grown in the house in pots or boxes of earth or even in water as well as in the garden, and they are better adapted for that purpose than any other flower.

Plant them any time during September, October, and up to the middle of November at the North and during November and December at the South. Plant Hyacinths and Narcissus some 6 inches apart and 4 inches deep. Tulips 4 inches apart and 2½ inches deep. Crocuses 2 inches apart and 1½ inches deep. Plant in good soil and where water drains off readily. Although hardy, the protection of a little barnyard manure is desirable.

For the house, plant in pots or boxes so the tops of bulbs are even with the surface. About three Hyacinths or Narcissus to a 6 inch pot, 6 Tulips or 12 Crocuses. Set them in a cool, dark place for some 6 weeks to root, after which bring them to the light to grow and bloom.

We offer first class Bulbs only. No satisfaction in small, cheap Bulbs. We also prepay all transportation charges. Remember this when comparing prices with those of other houses.

**Hyacinths** In separate colors but unnamed we have them very good and cheap, and we heartily recommend them for both house and garden culture.

We offer large, sound, first class bulbs of Single Hyacinths in following separate colors: Dark Red, Pink and Rose, Pure White, Blush White, Dark Blue, Light Blue and Yellow, also the same colors in Double Hyacinths.

All at 6c each, 50c per 10 and \$4.00 per 100.

To make a round bed 6 feet in diameter, as here illustrated, requires 127 bulbs, viz.: 19 blue in the center, 42 white and 66 red for the outside. We will furnish these for \$5.00.

**Tulips** **SINGLE EARLY**—In separate colors as Dark Crimson, Rose, Scarlet, Yellow, Pure White, Carmine, Gold Striped. All at 20c per 10, \$1.75 per 100.

**DOUBLE EARLY**—In separate colors as above at 25c per 10, \$2.00 per 100.

**EXTRA FINE MIXED**—Either single or double at 25c per 10, \$2.00 per 100.

**LATE SHOW**—In extra fine mixture at 25c per 10, \$2.00 per 100.

**PARROT**—A superfine mixture at 20c per 10, \$1.50 per 100.

A circular bed of Tulips 5 feet across planted 4 inches apart in three colors would require for the first three rows in the center, say 36 crimson, next two rows 54 yellow and last two rows 78 white. Total 168 bulbs. These we will furnish in choice stock, either Single or Double Tulips for \$3.00.

**Narcissus** **DOUBLE**—Popularly known as Daffodils. White, yellow or mixed, 3½c each, 30c per 10, \$2.50 per 100.

**LARGE TRUMPET**—Single. White, yellow or mixed, 3½c each, 30c per 10, \$2.50 per 100.

**POET'S**—White with scarlet eye. Sweet scented, 3c each, 25c per 10, \$2.00 per 100.

**POLYANTHUS**—(Paper White Grandiflorus). The best for growing in water. Superior to the Chinese Sacred Lily in size, color and fragrance. 4c each, 35c per 10, \$2.50 per 100.

**POLYANTHUS**—Extra fine mixed colors, 4c each, 30c per 10, \$2.50 per 100.

**Crocuses** Large flowered. Blue, white, yellow, purple, striped and variegated. Each color separate, 10c per 10, 60c per 100. All colors mixed, 10c per 10, 60c per 100.

A circular bed 4 feet in diameter planted 2 inches apart in four colors would require, say 4 rows blue in center 60, next three rows white 108, 3 rows striped and variegated 162 and 2 rows yellow 138. Total 468 bulbs.

We will furnish the whole lot of choice, sound bulbs for \$3.00.

**Colchicum** Or Autumn flowering Crocus, is a curious and interesting flower. The leaves appear in Spring and die; the flowers come in the Autumn without leaves. Each bulb produces generally 6 to 8 flowers.

Single flowering bulbs, 8c each, 70c per 10.

Double flowering, 12c each, \$1.00 per 10.

**ON DUTCH BULBS WE PREPAY ALL TRANSPORTATION CHARGES.**

# Fall Planting

As a rule fall is much the best time for planting hardy trees, vines, shrubs and bulbs, and we can and do ship them all through October and November. We recommend, however, that they be left standing in the nursery up to October 15th to ripen and harden. When planted in the fall, the cut ends of the roots callous by spring; the winter's rains and snows settle the soil closely around the roots and the tree is ready to start to grow early and with vigor. Do not trim the tops of trees in the fall, but do so early in spring. It is also well to bank the soil high around the trees and plants as a protection to the roots and to prevent too much swaying in the wind. This applies to all stock offered herein except strawberries, black raspberries, dewberries and perhaps peaches. These do not do as uniformly well, planted in the fall, as other stock.

Another thing in favor of fall planting is that the weather is usually better, the soil dryer, and you have more leisure than in spring. But if the weather is wet and you are finally obliged to plant in the mud, if at all, the winter's frost will pulverize the soil again; while if you plant in the mud in the spring, the ground will be hard and uncongenial all summer.

After fall planting the next best time is early spring. Plant as early as the ground is dry enough to work well, especially strawberries and black raspberries. Late spring planted stock may do well if the weather is favorable; but if it should turn hot and dry early, as it sometimes does, the stock will certainly suffer, even if it does not die. For this reason it is a good plan to get the trees and plants in the fall, even if you do not plant until spring. Heel them in as recommended below, and have them on hand to plant whenever you are ready.

**CARE OF STOCK WHEN RECEIVED**—When the stock arrives, unpack and plant at once. Should it, however, appear frozen, do not unpack, but cover it up in a cool dark cellar or other convenient place where it may thaw out gradually. Freezing does not injure plants, but rapid thawing with exposure to air and light does. If not ready to plant when received, heel them in, in a dry place, protected both against sun and sweeping winds. Dig a trench deep enough to hold the vines, plants or trees, open the bundles and spread them out against the side of the trench an inch or two thick; cover them with a layer of soil, which press against the side of the trench to exclude air; and put on another layer of stock and soil, etc., until completed, taking great care to keep the different varieties separate and well labeled. If the vines and plants are left to be heeled in over winter, both root and top must be well covered with earth, and over that place a cover of coarse horse manure or other litter to insure safety. Trees are heeled in leaning with the prevailing wind at an angle of 30 to 40 degrees and buried one-third to one-half of their length. The balance may be covered with evergreen boughs or other brush, but nothing that would attract mice.

---

**FUMIGATING**—There are no San Jose Scales in our Nursery. Still the laws of some states require the fumigation of nursery stock with hydrocyanic acid gas, and the commissioner of this state recommends it. On this account we have built a fumigation house of the most approved pattern, where we will fumigate the stock free of charge for all those who need or desire it.

---

**A COPY OF CERTIFICATE OF INSPECTION** will be attached to each shipment.

# Terms and Conditions

5, 50 and 400 at 10, 100 and 1,000 rates respectively; 10, 100 and 1,000 may be made up of not to exceed 3, 10 and 20 varieties respectively. Small fruits, not over 4 varieties to the 100. Strawberries not over 2, nor over 5 varieties to the 1,000.

**FREIGHT PREPAID**—Orders of \$10.00 or over, with a remittance for full amount, will be sent freight paid to any shipping point in the states of New York, Pennsylvania, Ohio, Michigan, New Jersey, Delaware, and all the New England states except Maine. Also to the following shipping points: Wheeling, W. Va.; Louisville, Ky.; Indianapolis, Ind.; St. Louis, Mo.; Chicago, Ill.; Portland, Me.; Richmond, Va., and Baltimore, Md. Also to the following points if one-tenth is added to the price of the stock, viz.: Raleigh and Wilmington, N. C.; Charleston, S. C.; Savannah, Ga.; Jacksonville, Fla.; Chattanooga, Tenn.; Kansas City, Mo.; Omaha, Neb.; and St. Paul, Minn. From these points to destination the purchaser pays the freight on receipt.

**POSTPAID**—At single and ten rates the following will be mailed postpaid: Grape Vines, Small Fruits and small plants of Ornamental Shrubbery. Also small trees, cut back, at the single rate of the largest size priced. Inasmuch as postage on vines and plants to the Pacific States and some other distant points is cheaper than express charges we often get orders for hundreds and thousands of vines and plants to be mailed. This we do when postage is added to the price, according to the following table:

Postage	Per 50	Per 100	Postage	Per 50	Per 100
Grapes, Currants and Goose-			Blackberries .....	\$0.30	\$0.50
berries, 2 year, No. 1.....	\$0.80	\$1.50	Strawberries .....	.15	.25
The same, 1 year, No. 1.....	.55	1.00	Asparagus, 1 year .....	.20	.35
Raspberries .....	.25	.40	Asparagus, 2 year .....	.30	.50

Our vines and plants are very strong, hence the large amount of postage required. The postage on No. 2 grape vines, gooseberries and currants is but two-thirds as much as on No. 1.

**CLUB ORDERS**—Parties requiring but a few plants or vines are invited to take advantage of our offer to send \$10.00 worth, freight paid, by clubbing in with or taking orders of their neighbors.

**CLAIMS** of any kind must be made within five days after receipt of goods. Those made after a lapse of ten days will not be entertained.

**TERMS**—Cash with order. Remit by postal or express order, bank draft, or registered letter at our risk. Money loose in ordinary letters is at the risk of the sender. Individual checks for less than \$50 must be made out for 15 cents extra to cover exchange. \$5 or more sent C. O. D. by express or freight, if desired, provided that one-quarter of the amount, but not less than \$2.00, accompanies the order.

**OUR GUARANTEE**—We guarantee all our stock true to name and of quality represented, to this extent—that should any prove otherwise we hereby agree, upon proper proof, to refund the money received for the same, or else replace with others that are true. But we are not liable for damages other than herein named.

**OUR REFERENCES**—Regarding our reliability and responsibility we would refer you to the Citizens Trust Co., National Bank of Fredonia, Postmaster, Express Agent or any public man or institution here. When inquiring do not forget to enclose a self-directed and stamped envelope for reply. Your own banker may also be able to give you our standing from the Mercantile Reports.

# PRICE LIST OF GRAPE VINES, ETC.

*Of Grapes, Currants and Gooseberries we furnish Cuttings in lots of not less than 100 of a kind at 1-10 the price of 1 year*

*No. 1 plants; 1 year No. 2 plants at 2-3 the price of one year No. 1; 3 year No. 1 plants at 1-2 additional to price of 2 year No. 1.*
